Experience

ClickFluent – *Digital Marketing Consultancy*

Remote

Data Analyst

July 2023 - Present

- **Managed data governance and integration projects** for 30+ clients, overseeing Google Cloud infrastructure, BigQuery, IAM, and APIs; coordinated with management and clients on database needs, ensuring data quality, availability, and privacy through effective pipeline and warehouse execution
- **Developed Python-based web applications with SQL and GCP integration**, focusing on automated reporting systems, NLP for keyword analysis dashboards, and Machine Learning for a bid engine, automating approximately 90% of these processes.
- **ETL platform management and client onboarding**, leveraged ETL service to connect to Platform data sources including Meta, Google, Microsoft, and others using API connections and transform data for company use.
- **Tableau server administration and dashboard creation**, oversee suite of reports where I administered credentials and access across the company and clientele as well as curated data for use across accounts.
- **Trained and managed junior Data Analyst**, teaching best practices for Data storage, transformation, and dashboard creation for business intelligence. Delegated work across new projects.

Treasury4 – *Treasury Data Management SaaS Startup*

Spokane, WA

Data Analyst

March 2022 – June 2022

- **Supported the software development team in the creation of over 50 dashboards**, to be integrated into our service using Tableau and Power BI. Focus on best practices of efficient querying and clear data visualization.
- **Hands-on experience with SQL Server sandbox management**, learning the basic principles of database management and leveraging the DB for proof of concept and research projects.
- **Data Extraction and Transformation using ETL tools**, including Azure Data Factory for SQL integration and Databricks for Machine Learning applications.
- **Led the development of a Robotic Process Automation tool**, to streamline data entry from client documentation, demonstrating the ability to design, build, and launch new data models and visualizations in production.

Education

Georgetown University, McDonough School of Business

Washington, DC

MS Business Analytics – 3.82 GPA

Dec 2023

- Worked with Deloitte Sustainability to leverage ML techniques to better understand Natural Disaster Impact
- Competed in nationwide case competition where we worked with LLMs using prompt engineering to create an app that streamlined the process of creating doctors' notes during a patient visit
- Completed degree while working full-time developing advanced organization and time management skills

Gonzaga University, School of Business

Spokane, WA

BBA with concentration in Management Information Systems - 3.94 GPA

May 2022

- Graduated Summa Cum Laude
